Valuation

Business Valuation

- For governance, compliance, or key decisions be it acquisitions, disputes, or value optimization, we provide critical insights.

Valuation of Intangible assets

- Businesses are shifting towards digital and intangible assets like brands, technology, and data. These drive market value beyond net worth, making valuation crucial for investors and stakeholders.

Purchase Price allocation

- Purchase Price Allocation (PPA) allocates the purchase price of an acquisition to the fair value of assets and liabilities under Ind AS, IFRS, and US GAAP. It determines goodwill and applies to M&A and slump sales. A complex process, PPA requires expertise in valuation methodologies and business value drivers.

Determination of Swap ratio

- Swap determination ensuring fairness, transparency, and stakeholder confidence in deal-making & strategic decisions to drive growth through M&A, buyouts, or restructuring.

Impairment assessment

- Financial reporting requires periodic impairment assessment of CGUs, tangible, and intangible assets under Indian GAAP, Ind AS, IFRS, and US GAAP to ensure accurate valuation

Portfolio valuation for PE and VC funds

- Valuations of Private Equity(PE) and Venture Capital (VC) investments in accordance with IPEV guidelines.

Valuation of ESOPs

- Valuation of employee stock options and equity awards for regulatory compliance, reporting, and tax purposes, using complex modeling to address unique terms and risks

Financial due diligence

Buy Side

We help clients assess business performance and value by analyzing financials, industry drivers, cash flow sustainability, and overall financial quality from an investor's perspective

Sell Side

We help in preparing an independent financial review of a company to identify key value drivers, risks, and deal considerations, helping management present a clear, credible picture to potential investors or buyers

Readiness & Assistance

We help businesses become investment-ready by managing the diligence process end-to-end — from financial analysis and data room setup to structuring advice and coordination with investor teams.

Global Reach in a Short Span of Time

In a relatively short period, Fyntres has successfully built a client base spanning six geographies. This achievement reflects not only the trust our clients place in us, but also our ability to deliver consistently high-quality work that meets global standards. By combining deep technical expertise with a client-centric approach, we have been able to seamlessly support businesses across diverse markets and regulatory environments. Our emphasis on accuracy, transparency, and practical insights ensures that our deliverables stand up to scrutiny and add real value to decision-making. The speed at which we have expanded across geographies underlines our adaptability and commitment to delivering best-in-class valuation and financial advisory services, regardless of location.

Team

Experienced team focused on delivering a successful outcome

Akhil Jain, ACA, CFA (L2)
